

Financial services for the public sector

We're here to help

Public sector organizations may differ greatly in their mandates, but institutions like yours share a number of unique needs and challenges that set you apart from for-profit corporations.

Funding and the need to meet approved budgets often results in a constant drive to do more for less money. And while you may have influence over some revenue sources, much of it may lie beyond your direct control.

Shifts in service focus and methods of delivery often means that you need to find ways of doing more for less. Through all of these changes, institutions like yours must not only maintain their infrastructure but also continue to deliver a high level of service.

RBC® is a leading financial institution serving the public sector across Canada. Our account managers see first-hand the many opportunities and challenges organizations like yours face. We use this first-hand experience to provide the advice and financial solutions that you need to serve your clientele and fulfill your mandate.
