We were proud to join the Durham Region delegation recently at **HANNOVER MESSE** 2025, the world's most important trade show for industrial and energy technologies. At this important time, Canada was the partner country for Hannover Messe 2025 and it was an incredible platform to showcase Oshawa's innovative research and development, make connections with global businesses and political leaders, seek new opportunities to open new markets for Durham based businesses and share our story globally.

The **Invest Durham** delegation, including **Automotive Parts Manufacturers' Association (APMA)** announced exciting developments for Project Arrow 2.0, highlighted key partnerships, and even met German Chancellor Olaf Scholz. Our participation underscores the importance of diversifying trading relationships amid current global trade dynamics and U.S. tariffs.

We're excited about the future and the potential these new connections and opportunities bring to our city. Thank you to everyone who made this event a success!
