INNOVATION IN EMERGING CITIES

As the Canadian economy continues its transformation from resource-based to knowledge-based, cities have become increasingly important centres for job and wealth creation. Emerging cities—fast-growing communities with highly educated and energized young adults—are uniquely positioned to foster innovation and entrepreneurship. With proximity to nature and a variety of lifestyle choices, they bring together the technology, talent and creativity to drive the new economy.

Innovation in Emerging Cities is a FREE, day-long forum featuring keynote presentations from Steve Dotto on “How technology is changing everything” and Dr. Salvador Ferreras on “What businesses need to do to prepare for Industry 4.0”.

Panel discussions featuring leaders from industry, post-secondary education, First Nations and government will follow up these keynote presentations.

An additional panel will involve political leaders who will discuss “How Government Supports Innovation”.

Steve Dotto, Dottotech
